

4G LTE MOBILE ROUTER

HIGH-SPEED MOBILE BROADBAND INTERNET

Built-in 4G modem with up to 150Mbps downstream, 50Mbps upstream speed & 802.11n WLAN with up to 300Mbps wireless speed

SECURELY SHARE NETWORK CONNECTION WITH A GROUP

Embedded firewall protection, user access control, WPA/WPA2 wireless security, all from a single device

GO ANYWHERE

Small enough to fit in your pocket and the rechargeable battery means you're not tied to a wall outlet.

The DWR-932 4G LTE Mobile router is a 4G LTE Cat.4 high speed broadband wireless WAN(WWAN) to WiFi mobile hotspot. The DWR-932 uses a 4G internet connection to give you a simple and fast WiFi network anywhere you need one. Instead of limiting your mobile internet connection to a single device through a USB dongle, the DWR-932 allows you to create a WiFi hotspot to share your connection. The convenient size means you can share your connection anywhere; use it in a café to send e-mail while your friend reads the news, or at the airport so your coworkers can chat with customers while waiting for your plane.

Connect Anywhere

Simply insert your data-enabled SIM card, and this handy device lets family and friends in on the fun. The DWR-932 gets you connected when an impromptu network must be set up; it's ideal for business trips to share an internet connection with everybody during a meeting, and it's great for travel, allowing you to provide all your travel companions with internet access whether they're using a laptop or a mobile device.

Flexible Usage

The DWR-932 4G LTE Mobile router gives you instant connectivity in a powerful yet portable device that fits easily into your pocket, wherever you go. WiFi protected setup (WPS) lets you create a WiFi network that uses top-of-the-line security with just the touch of a button. The rechargeable 2640mAh Li-ion battery allows you to stay connected for long periods of time, and it's plug-and-play with no complicated software to install. Getting online with the DWR-932 4G LTE Mobile router is quick, easy, and convenient.
